PERSONAL INFO

Country: Mexico
Age: 22

About Me

I'm a passionate Front End developer specializing in React. At 22 years old, I've gained experience in developing modern, highly interactive websites. My user-oriented development approach enables me to create memorable and engaging digital experiences for website visitors.

I'm an effective communicator and work well in teams, which allows me to collaborate effectively with designers, developers, and other professionals to create high-quality products. I'm committed to continuous learning and constant improvement, and I always seek opportunities to expand my skills and knowledge in the field of Front End development.

Work Experience

November 2021 - March 2022 at BrightCoders Academy

This was a react native Bootcamp where I worked with that technology and learned a lot. I can use different skills like teamwork, clean code, adaptability, problem-solving, communication, and remote work culture.
Certificate and Badge.

Projects

Take my dog
It's a mobile app where customers can find walkers for their dogs. The main and amazing implementation will be the use of a map to find your dog walker and know where he is.

Gif Finder App
This is a personal project app, you can find different kinds of gifs based on your search, You can get any gif that you want in this app. It gets the gifs using the Giphy API.

To-do App
In this personal app, you can add your things to do and it doesn't matter if you close the windows because all are saved in the local storage. You can add and remove all the tasks that you want.
